

Comments:

Presenter gave numerous opportunities for group participation.

Liked hearing what others were doing in their schools. Instructor was very knowledgeable and professional. Enjoyed the class and would recommend it to others.

Good training. Thank you to the instructor! I appreciate their iPad knowledge.

I liked being able to attend this course at my school. Its more beneficial to me to have information broken down into smaller parts. For staff who need the iPad training in the future, it would be so convenient and accommodating to have it at the schools.

Very helpful information. Great Job!

The instructor did an excellent job engaging the group and is very knowledgeable for the area.

Great course with very helpful information and apps.

Randi was very knowledgeable and resourceful to conduct this class. I personally enjoyed learning ways to involve my students to help them enjoy their education.

Great job!!

The technology staff was helpful in answering questions and helping individual needs. Randi did a wonderful job!

The class was very informative and helpful.

I really enjoyed the class, and even though I already had a personal iPad, I gained knowledge of more tools to use in my classroom that I did not previously know.

I thoroughly enjoyed this iPad course. I hope future classes will be offered.

I found the comment of the QR codes extremely helpful. It is often hard to get the older students to enjoy coming to "speech" and this gives them technology to use to make activities more fun. I was also excited to learn about the options available to project an iPad onto a projector screen. This will allow me to better utilize the iPad in a larger setting.

Randi did a great job helping me with the initial set up of my iPad. She helped me create short cuts to various websites and email. She did a great job expanding my knowledge of the iPad. I really enjoyed learning about QR Codes and using Reflector.

The course will springboard creative/interactive learning in my classroom for the new iPad cart in my school.
